Product Features:

1. Separation of HEPA and activated carbon filters

- Cost-effective and higher flexibility of changing filters.

2. Independent controller separated from the main unit

- Sensors installed in LED controller can detect IAQ away from the main unit which suggests more accurate IAQ measurement and control.

3. Intelligent control

- Automatically adjust fan speed to different environmental changes (e.g. rise of pollutants level, presence of humans in the area, etc.) to offer optimal usage, energy saving and extension of filters' lifetime.

4. Lower noise level in sleep mode

- Automatically reduce fan speed and brightness between 10:00-18:00. (Noise level between 32-34db(A))

5. Installed with APP

- Able to read data (CO₂, temperature, humidity, PM2.5, formaldehyde) and control the air purifier remotely.

6. Efficient and quick cleaning

- 360° rotating air stream to enable accurate monitoring of indoor air quality.
